ABOUT ME

I am a self-taught developer with an excellent learning ability for problem solving. I have experience in the implementation, development and management of projects in a programming team. I always like to be learning new things, from strategies and technologies that allow me to expand my skills, to work methodologies that allow me to optimize my performance. I seek to add value in the development and implementation of different technologies to a company that respects its organizational values.

WORK EXPERIENCE

Personal projects - Front End

Present

I am constantly working on personal projects implementing my stack of technologies, the code and its publication can be found in the contact section.
